

Running Tic Tac Toe

1. This program used Python version 3.7.2 which you can download here:
<https://www.python.org/downloads/release/python-372/>
2. Once downloaded, find *tic.py* in the “Tic Tac Toe” folder.
3. Right-click on *tic.py*, scroll over “Edit with IDLE”, then scroll over “Edit with IDLE 3.7” and click it.
4. *Tic.py* should now be opened. Scroll over “Run” in the top, then click “Run Module.”
5. The game is composed of a simple 3x3 grid. Each player will take turns placing their symbol, beginning with ‘X.’ When the game is finished (player has won or players have tied), click on any of the cells to restart. Enjoy!
