Running Tic Tac Toe

1. This program used Python version 3.7.2 which you can download here:
https://www.python.org/downloads/release/python-372/

2. Once downloaded, navigate to the "Tic Tac Toe" folder in cmd or powershell.

3. Enter command "py tic.py" and the game window should appear.

4. The game is composed of a simple 3x3 grid. Each player will take turns placing their symbol, beginning with 'X.' When the game is finished (player has won or players have tied), click on any of the cells to restart. Enjoy!
